RUTO Telemetry Head

The RUTO telemetry head enables quick and easy reading by collectors of water and heat meters equipped with the Wireless M-Bus OMS radio module. The radio head listens to and receives radio frames from measuring devices. The head sends data to the mobile application via Bluetooth communication, which is then saved in the phone's memory. The measurement data collected on the mobile device is sent to the GlobTree system. Data can be collected both when walking - walk-by system, and when traveling - drive-by system, covering collector routes. Radio reading takes much less time, and the digital method of data exchange eliminates errors of manual data entry.

Technical specifications

| Power supply | 3.7V 1500mAh lithium polymer battery |
|---------------------|---|
| Working temperature | -20°C - 55°C |
| Communication | wM-Bus 868,95 MHz / Bluetooth Low Energy |
| Antenna | external |
| Communication | wM-Bus 868,95 MHz; 2G/3G/4G/GSM/GPRS |
| | Wireless M-Bus - RECEIVER |
| Frequency | 868,30MHz (868.00 MHz do 869.60 MHz) |
| Receiver range | Free space - up to 800 m Inside the building - up to 30 m |
| Communication mode | wM-Bus OMS modes T1 and C1 |
| Encryption | AES: Advanced Encryption Standard: 128-bit key length |
| | Bluetooth Low Energy - RECEIVER/TRANSMITTER |
| BLE version | 5.2 |
| Range | <100m |
